

WONDERWARE SOLUTIONS

ACHIEVE OPERATIONAL EXCELLENCE WITH MAVERICK

When your company elects to implement Wonderware® software solutions, partner with the expert who offers the insight and proven methodology needed to achieve your goals. As an Arcestra® Certified System Integrator (SI), MAVERICK Technologies has managed and deployed many successful Wonderware projects by leveraging its deep processing and manufacturing knowledge in a variety of vertical markets. Let us do the same for you.

With limited budgets and tight timelines, you need the assurance of working with an SI who understands your business and the unique challenges and requirements of your industry. Most importantly, you need a partner who knows how to utilize Wonderware products to meet your high-level needs.

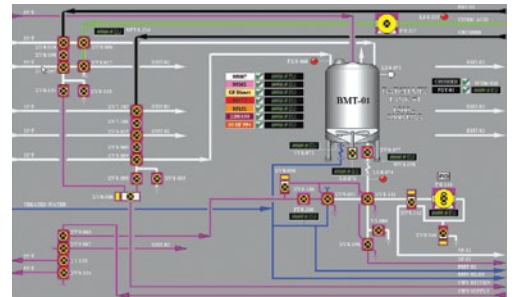

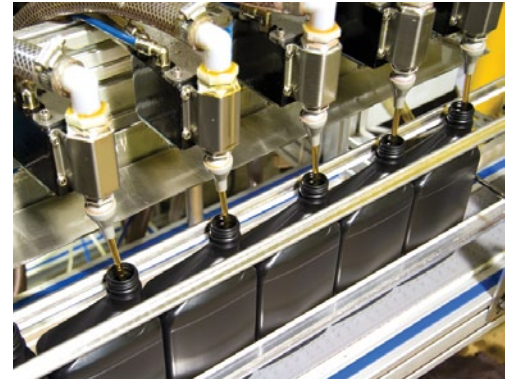

As a Microsoft® Certified Business Solutions Partner working with Wonderware, MAVERICK has the resources to help you quickly realize the full benefits of the software. Our experienced engineers and business consultants work with you to achieve complete integration with your existing systems and deploy applications that drive standards. The result is a robust, scalable solution that will deliver the real-time data you need to make intelligent plant decisions.

Experience and Qualifications

MAVERICK has helped many companies implement Wonderware software solutions in the areas of production and performance management (P&PM), geographical SCADA and supervisory HMI. Whether it's a single installation or a multisite, multinational deployment, MAVERICK has the experience, the process know-how and the delivery model to make your Wonderware product successful — on scope, on budget and on time.

We take pride in our role as an Arcestra Certified SI and in the additional Wonderware product certifications that many of our personnel have obtained through training and practical experience. Signifying our commitment, we have created a dedicated Wonderware leadership team and execution team within our company. We specialize in analyzing your operations and business objectives to create high-quality, customized or commercial off-the-shelf Manufacturing Execution Systems (MES) and vision solutions that improve the production and performance management of your manufacturing ecosystem.

Additionally, our Microsoft certified technicians provide functional expertise in the technologies and industry standards that Wonderware utilizes, including the Microsoft Windows® operating system, SQL Server™ database software, BizTalk® server and .NET connection software. Our comprehensive knowledge allows us to ensure easy application

installation and maintenance while significantly lowering our clients' total cost of ownership. We leverage our expertise in technology and industry standards, such as ISA-88, ISA-95, ISA-99, B2MML, Make2Pack and others, to develop a framework of solutions that fit your needs and business challenges.

Proven Solutions

To further lower the cost to our customers, we have developed a Wonderware repository that allows for easy access to our proven solutions. Just as Wonderware QuickStart applications enable fast implementation of best practices for specific manufacturing scenarios, our repository allows us to quickly redeploy the successful Wonderware toolkits and standards we have developed and stored for this purpose.

Domain Expertise

MAVERICK adds value by combining our proficiency in a variety of technologies and services with our understanding of the manufacturing process. Many clients select us for our ability to self-perform the design and execution of plant floor automation, data management, supervisory control and production and performance management systems. Our mastery in all these areas helps you realize greater optimization of your Wonderware solutions.

Disciplined Methodology

Our third-party audited and certified project execution methodology provides a consistent means of achieving customer goals when implementing Wonderware solutions. Working within an established scope, schedule and budget, our project management professionals (PMPs) ensure that the entire MAVERICK team follows our Project Complete® methodology. We interlace our quality system with every step of the project execution to safeguard the final outcome. Where applicable, we guarantee compliance with GAMP4 and uphold industry standards in meeting our project objectives.

Locally Based with Global Reach

MAVERICK's broad base of skilled personnel embodies a powerful presence in the marketplace. Our network of international alliances and our participation in major worldwide projects together fortify our foundation of global capabilities. Additionally, our widespread U.S. offices allow for quick technician dispatch to almost any location.

Are you ready to partner with MAVERICK to optimize Wonderware products for your business?

MAVERICK Technologies is a global engineering, systems integration and operational consulting firm. We deliver innovative solutions for a wide range of manufacturing and process clients, leveraging our extensive network of skilled employees deployed from locations around the world.

Our talented staff is dedicated to helping our clients break away from the business inefficiencies they face. We deliver profitability improvement — individually in plant automation, performance management and business systems, and holistically by integrating knowledge across the enterprise.

Specific Wonderware Product Experience

Wonderware System Platform

- Wonderware Application Server
- Wonderware Historian
- Wonderware Information Server
- Wonderware Integration Server

Wonderware Clients

- InTouch® HMI
- Analysis Client
- Reporting Client

Wonderware Function-Specific Modules and QuickStarts

- Equipment Operations Module
- Equipment Performance Module
- Manufacturing Performance Module
- Manufacturing Quality Module
- Batch Execution Module
- Manufacturing Execution Module
- Enterprise Integration (WWEI)

Legacy Product Expertise

- ActiveFactory™ software
- SuiteVoyager® software
- SCADAAlarm™ software
- InBatch™ software
- InControl™ software
- QI Analyst™ software
- DT Analyst™ software
