

At MAVERICK Technologies, we partner with you to define and achieve your operational goals. We provide a range of time-honored field services managed solutions, from FEL development and analysis to comprehensive commissioning and startup services. Whether you need conceptual assistance or help in the eleventh hour, we're there for you — leveraging our team of more than 400+ professionals and our experience gained through more than 17,500 successful projects, all to meet your needs.

Process-Driven Approach

Our methodology is built around problem identification and comprehensive solutions. We focus on client requirements — not technology — and getting to the bottom of the issues they're experiencing. Technology isn't the solution; it's simply a tool to help us achieve our goal of better process manufacturing.

I&C FIELD SERVICES

Commissioning/Construction Management

Our team can assist you with all your construction, commissioning and startup support needs — providing full I&C support, detailed planning, process strategies and much more.

- Management of MAVERICK and/or third-party resources
- FEL services (budget, scope, TIC, TCO, etc.)
- Commissioning

Technician Services/Calibration

We offer direct and client-managed technical staffing solutions for any industry, assisting you with maintenance and operations. Our on-site support ensures compliance, quality and traceability.

- NIST traceable calibration
- Validation and planning
- On-site technical services and training

Outage Services and Planning

We provide time-tested processes for planning and implementation by experienced management and technical staff. Our processes and staff ensure your operational, maintenance and turnaround goals are achieved.

- Planning and scope development
- Process validation (P&IDs, function specifications, field engineering, etc.)
- Startup and dynamic testing

Installation Services

Our team offers construction management and direct-managed technical and craft resources to ensure your control projects are on schedule and installed with the highest quality available in the industry.

- Construction management (scheduling, tracking, reporting, etc.)
- Conduit and wiring systems installation
- Instrumentation and process tubing systems installation

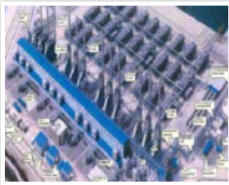

I&C Field Services – Case Studies

Major Pulp & Paper Producer Restarts Mothballed Mill

A major pulp and paper company partnered with MAVERICK to restart an integrated pulp and paper mill that had been shut down for two years. MAVERICK helped the client complete the commissioning and field reprogramming of multiple systems, including overall project management of the control system. MAVERICK guided a successful startup and also worked with the customer to identify and close resources gaps throughout checkout and startup.

Commissioning and Startup of World's Largest Utility

MAVERICK was contracted to support the commissioning and startup of a new GE installation for the first Integrated Independent Water and Power Project (IWPP) in Saudi Arabia, producing 2800 MW and 210 MGD of water in Jubail City. The successful project was the world's single largest utility and first IWPP in Saudi Arabia.
