

At MAVERICK Technologies, we partner with you to identify your specific automation challenges and develop solutions that meet your immediate and long-term needs. Whether you need new systems or new results from an existing infrastructure, we can leverage our 500 professionals and experience gained through 15,000 successful projects in order to meet your challenges.

## Process-Driven Approach

Our methodology is built around problem identification and comprehensive solutions. We focus on client requirements – not technology – and getting to the bottom of the issues you’re experiencing. Technology isn’t the solution; it’s simply a tool to help us achieve our goal of better process-manufacturing.

## AUTOMATION SOLUTIONS SERVICES

### Control System Design

Our team will design a solution around your process, coordinating the right controls with the most critical process data so you can make informed decisions.

- Overcome legacy system limitations
- Receive on-site training
- Establish a framework for operating discipline

### Industrial Automation Integration

We’ll integrate your process automation systems to deliver optimal efficiency, quality and safety.

- Lower your maintenance costs
- Improve quality control
- Reduce downtime

### Process Automation

Our team will work with you to automate your processes to reduce variability and unplanned downtime, and ensure system reliability.

- Enhance process automation and control
- Streamline your business process
- Ensure system security

### Regulatory Systems and Services

We’ll implement process validation and validated systems for ensured compliance with industry regulations and best practices.

- Establish a chain of custody for analysis
- Secure data integrity
- Achieve regulatory compliance

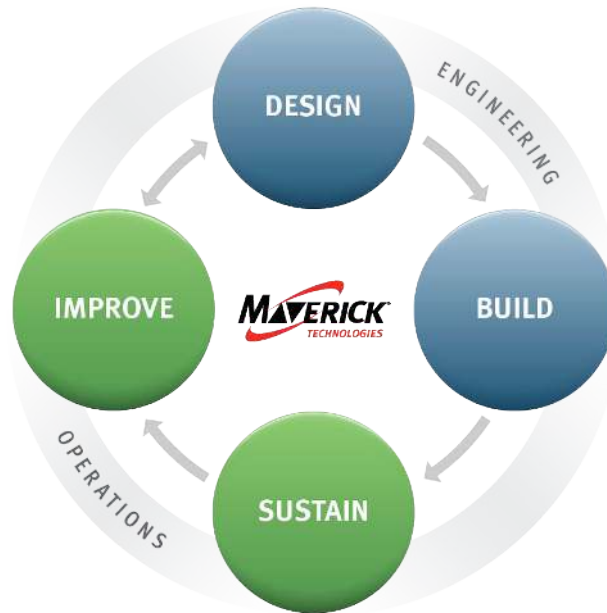

### Control System Migration

MAVERICK will help you leverage the latest control technologies in order to improve productivity, agility and profitability.

- Obtain funding
- Continue operating during migration
- Lock in the gains for the long run

MAVERICK Technologies offers a full range of automation solutions for enterprise-wide lifecycle support.

#### DCSNext®

An innovative, results-focused approach to DCS migration, DCSNext doesn't just bring our clients up to speed—it propels them ahead of their competition for years to come. DCSNext combines a four-step comprehensive study of the DCS migration challenge with a phased approach to execution and ongoing support. Its proven methodology delivers a full range of benefits, including minimal downtime, improved productivity, increased profitability and enhanced agility. To learn more, visit [dcsnext.com](http://dcsnext.com)

#### PlantFloor24®

The world's first full-service, platform-independent hardware, software and process support solution, PlantFloor24 keeps manufacturing operations online and improving 24/7. PlantFloor24 is a trusted solution for outsourcing manufacturing automation services previously handled by internal staff or a multitude of vendors. Through PlantFloor24, manufacturers are able to reduce operational costs, augment staff with multidisciplinary skills and improve asset management. To learn more, visit [PlantFloor24.com](http://PlantFloor24.com)

#### SureStart®

A proven process for better startup and commissioning, SureStart draws on the efficiencies gained through eStart<sup>SM</sup>, MAVERICK's breakthrough digital commissioning tool, and 200,000+ hours of collective annual experience to help you prevent budgetary overruns and schedule delays. From planning and implementation to closeout documentation, SureStart helps you start up smarter — and sooner. To learn more, visit [sure-start.com](http://sure-start.com)

#### OnTrack™

A suite of work process management solutions, OnTrack delivers the insight and real-time data your team needs to act quickly and consistently. OnTrack captures the tribal knowledge of your most experienced personnel, combines it with best practices and translates it into intelligent action plans for any situation. From resolving alarm events to managing scheduled maintenance, OnTrack makes it easy to keep tabs on task progress and refine future workflows for optimal effectiveness.
