

ON TRACK™

The right action at the right time. Every time.

MAVERICK
TECHNOLOGIES

Make every operator your best operator.

Planned or unplanned, any situation that affects operations requires a smart strategy to avoid production loss, safety risks and environmental damages. But everyone who manages your processes is different, which means their reactions are different, too. If they're relying on traditional SOPs, they might not be able to respond quickly enough. And as experienced operators retire, they take their many years of operational knowledge with them.

But now you can capture that tribal knowledge, combine it with best practices and translate it into intelligent action plans for any situation — with the OnTrack™ suite. Developed by MAVERICK Technologies, OnTrack is a suite of work process management solutions that deliver the insight and real-time data your operators need to act quickly and consistently.

OnTrack makes it easy to keep tabs on task progress and refine future workflows for optimal effectiveness. You can even track specific conditions and trends to prevent issues before they occur.

The OnTrack Difference

RIGHT ACTION

With accurate direction, newer operators can make smart decisions.

RIGHT TIME

Traditional SOPs can slow down personnel when they need to act fast.

EVERY TIME

A consistent response helps promote safety, productivity and uptime.

ONTRACK ALARM RESPONSE

Ensure a fast return to normal operations

Alarms are an essential part of the production process. They help preserve the integrity of your operations and protect the safety of your personnel — if handled correctly.

When an alarm is triggered, your seasoned operators respond instinctively. One alarm can quickly escalate into a critical situation that can be difficult for even the most experienced operators to know how to address properly.

But with the right work process, the most critical alarms that need action are prioritized and identified with an action plan. That way, every operator is able to take the right action, right away. The OnTrack Alarm Response solution puts that process in place.

When a critical alarm is triggered, the OnTrack Alarm Response solution immediately generates next steps and delivers them to key personnel. Clear-cut instructions ensure a fast return to normal operations by making it easy for your team to respond quickly, correctly and consistently.

The U.S. manufacturing industry

LOSES
\$10 BILLION-
\$20 BILLION

each year by incorrectly responding to alarms

If you're like most manufacturers, **IMPROPER ALARM RESPONSE IS**

COSTING
you up to **8%** of your production capacity

ONTRACK ALARM RESPONSE

Quick, efficient implementation

OnTrack Alarm Response is a focused solution that doesn't require a complete overhaul of your existing system. We'll help you with the initial setup and then show you how to improve your alarm system's effectiveness as you go.

And it takes less time than you'd think. Over the course of two weeks, we will fully train your team on how to use, maintain and add to the workflow system. By combining our team's field expertise with standardized technology, you'll learn how to quickly implement optimized workflows for every alarm situation — continually making your operations safer and more efficient.

Pre-deployment: Overview of alarm response integration

Review current SOPs

Prep configuration
for installation

Week 1 On-site: System installation and validation

Build alarm response workflows

Train system administrators

Week 2 On-site: Operator training and standby support

Analyze historical data

Create additional alarm
response workflows

OPTIMIZE YOUR RESPONSE WITH:

- Step-by-step instructions for promoting a consistent response
- Mobile-ready access for on-the-go monitoring and execution
- Real-time reporting for greater insight into who's doing what, where
- Historical records for ensuring compliance and tracking trends

MAVERICK Technologies offers a full range of automation solutions for enterprise-wide lifecycle support.

About MAVERICK Technologies®

Founded in 1999, MAVERICK is the largest independent systems integrator in North America, and is a global leader in industrial automation, enterprise integration and strategic manufacturing solutions for clients across a wide range of manufacturing and process industries. Leveraging its unique enterprise-wide perspective, MAVERICK identifies suboptimal operations and improves performance for greater safety, efficiency and overall profitability. The company's people, processes and technical capabilities ensure delivery of the right solution for every project, using the most appropriate technology. Organizations around the world depend on MAVERICK's responsiveness, results-driven approach and dedication to their success. Over the years, MAVERICK has completed more than 15,000 projects in 46 countries across six continents. To learn more about MAVERICK, please visit mavtechglobal.com.
