

UNLOCK THE FULL POTENTIAL OF YOUR ENTERPRISE

MAVERICK Technologies' Enterprise Integration Services

Our Enterprise Integration team will help you find more value in your current asset base – or help you find the right new technology – optimizing your operations while benefiting the entire enterprise. Engage our experts to partner with you in all areas, from data infrastructure and modeling, to manufacturing intelligence and manufacturing execution, to ERP integration to the manufacturing floor.

A Rockwell Automation Company

A few of the ways we help our customers:

Leverage the full potential of existing assets

Business case justification

Incremental solution roadmap for operation optimization

Preliminary engineering studies and roadmaps

Solution readiness assessments

Project planning and implementation

MAVERICK's knowledge of your business domain coupled with our expertise across all ERP and control systems uniquely qualifies us to provide your enterprise integration solutions.

Some of our specialty areas are:

Data Infrastructure

Manufacturing Intelligence

Operational Consulting

Manufacturing Execution Systems (MES)

WHAT MAKES MAVERICK DIFFERENT FROM OTHER SERVICE PROVIDERS AND SUPPLIERS?

Experience

300+ experienced and qualified engineering resources dedicated to helping find the right solution for you. Our team spends thousands of man-hours per year on Enterprise Integration projects, with in-house experts on ERP platforms, operational technology and process data historians.

Platform Independent

MAVERICK doesn't favor one technology, we favor the needs of our customer. Expertise across all platforms including: Rockwell Automation, AspenTech, GE, Inductive Automation, Northwest Analytics, OSIsoft, Sepasoft and more.

Partner Through All Phases

Your Enterprise Integration partner through design, build, configuration, integration, startup, commissioning, business integration, operational consulting and 24/7 remote monitoring.
